

GMS

Generic Measurement Software

Product Overview

Santec's GMS Generic Measurement Software is a customizable, easy-to-use software designed to work with many of Santec's test equipment including legacy JGR Optics instruments. Used by hundreds of production and lab facilities around the world, it is a reliable and proven software.

Pass/Fail Results

Set device specifications with custom colour coded pass/fail results.

Features

- Simple interface
- Minimal training required
- Production friendly
- Results saved via Microsoft Excel

Applications

- Fiber optic cable assemblies testing
- Component testing
- Mechanical and environmental testing
- Single-fiber and multifiber testing
- QA and R&D

Requirements

- Windows 7 or higher

Flexible Test Profiles

Compatible with many of Santec's test equipment including legacy JGR Optics instruments, GMS allows for the ultimate in test flexibility. Test profiles can be created by selecting the instrument you wish to use and inserting the desired test sequence.

Easy Long-term Measurements

Automated long term measurements can be configured with custom delays, number of iterations or for a set total test time.

Excel Integration

Results can be automatically exported to Excel upon completion of a test. An Excel template can be used to customize label print outs and reports. Long term measurements can also be exported to one single Excel file for easy data analysis.
